[droidcon Italy](#)

27-28 November 2020

OGR, Turin

droidcon is a two day conference with presentations, workshops, and an interactive exhibition, droidcon brings together 1200+ Android developers, designers and project managers to learn, share and network.

The theme for droidcon Italy 2020 is #android4everyone: a theme to promote inclusion of the whole Android value chain and inclusion of every type of person who participates in the Android community.

The OGR was re-opened in 2017 following a €100 million investment by the CRT Foundation. Combining outstanding tech infrastructure with a post-industrial ambiance, the OGR is a truly unique location.

We selected Sala Fucine for droidcon: it's one, large open space, with the talks, the catering and the exhibition all taking place side by side. Participants use headphones to follow the presentations and have full autonomy to move between the presentations and the networking area. This means there is a consistent flow of people around the whole event and especially the exhibition stands.

Testimonials

“droidcon Italy is a top-tier Android conference. It has high quality material for all engineers of any skill level.”

Gabriel Peal, Software Engineer **@Tonal**

“Droidcon Italy is one of the best conference in the Android ecosystem. I can't really miss the opportunity to meet so many experienced speakers, attend great sessions and get in touch with the Italian #AndroidDev community!”

Nicola Corti, Android Infrastructure Eng. **@Yelp**
